

Sierra Solar SYSTEMS

(530) 273-0303

2250 Watt Off-Grid 24V Solar PV System - \$13,525

15,120 W-Hr usable battery capacity - Up to 11,250 watts per day*

9 Solar PV Panels

250W Panels including Cables & Mounting Hardware

4000w Magnum Inverter / Charger

w/ Midnite Classic Charge Controller in a pre-wired E-Panel**

12 Deep Cycle L16 Batteries Including Cables

***An E-Panel is a quick and easy way to install most inverters. It is pre-wired with over-current protection, monitoring and disconnects required to install and use your renewable energy system.*

This large sized solar electric system will provide ample power for most basic needs such as lighting, appliances, electronics, refrigeration & water pumping.

*Given proper PV panel placement and 5 sun hours
